

HeadAmp4 Pro

Project Series

The HeadAmp4 Pro is a headphone amp that offers a unique set of features for use anywhere from studios to schools. It combines five high quality headphone amplifiers, a mixer and a talkback system in a small, rugged package.

There are Five headphone amplifier outputs. Each output is driven by the Main input or an Aux stereo input that overrides the main input when used. The Listen headphone output can monitor any or all of the other four outputs. This feature allows for use in an education environment where the teacher can listen to any of the students or separate monitor mixes in a studio. A mixer sums all of the output signals when the Listen All function is enabled.

Talkback from the internal or external mic is available to any of the outputs. Talkback is initiated from front panel switches on individual outputs or an external footswitch. The Headamp4 Pro provides phantom power to the front panel XLR jack allowing the use of a broad range of mics.

Multiple Headamp4 Pro's can be combined if you need a larger number of outputs.

SPECIFICATIONS:

Input Connections	2 - 1/4" TRS Balanced, 5 - TRS stereo, 1- XLR balanced mic input
Output Connections	4 - 1/4" TRS Stereo headphone
Max input Level	+20dBu.
Headphone output	100mW/ output max.
Frequency Response	10Hz to 40KHz +/- 1dB
THD	<0.010% (typical)
Dimensions	1.75"H x 5.9"W x 6.5"D (44.5mm x 150mm x 165mm)
Weight	2.5 lbs. (1.14 kg) with power supply and packaging
Power Requirements	USA - 120vac 60 Hz . Export units configured for country of destination.

APPLICATIONS:

Schools, Project, Home and Commercial Recording Studios.

Features and specifications subject to change without prior notice.
